

Frontend Developer

ANGULARJS / TYPESCRIPT

Who we are:

Newsletter2Go is a young and growing startup based in Berlin, and is one of the 50 fastest-growing tech companies in Germany. Our customers use our world class email marketing software to easily send millions of beautiful, relevant newsletters to their customers. Our mission is to empower our partners to send emails that people will love.

You'll work with a young and ambitious team that gives you the chance to develop your skills and your career. Flat hierarchies, lovely colleagues, a fast learning curve, and tons of fun: guaranteed. Lots of goodies, including free drinks and fresh fruit. We have tons of team events, and a catered lunch every Wednesday. You'll feel right at home before you know it!

What We Have to Offer:

Use the latest technologies to develop our software and design Newsletter2Go's product as part of a fast-growing team. Immerse yourself in an exciting and dynamic field, and bring your personal and career abilities to the next level.

Your Profile:

Are you a passionate Front End Developer and prefer to work independently, analytically and results-oriented?

Can you hit the ground running on new projects and are a team player who has an eye for the bigger picture?

Then apply today and make our software, and in particular our WYSIWYG Newsletter Builder even better.

Must-Haves

- Several years experience with JavaScript programming
- At least a first experience with AngularJS and Typescript
- Knowledge in Git, npm, bower, Sass, gulp
- English at a C1 or higher level

Nice-To-Haves

- Experience with Continuous integration (Teamcity)
- Knowledge of agile development methods and software (Kanban, Scrum, Jira)
- Interest in outstanding UI and UX

The position is available immediately.
Start your career with Newsletter2Go. We can't wait to meet you!
