

Distinguished Database Software Developer (m/f)

About Swarm64

We are an international company located in Berlin that integrates many cultures into one high-performing team. Our full-stack software and hardware database acceleration solution plugs into standard interfaces of popular relational databases (PostgreSQL, MySQL, MariaDB, Oracle). We want to make a difference and highly value creativity and reliability. Swarm64 is organised around teams, working agile and cross-functionally. We put people first, continuously grow our professional and personal skills and enjoy time together.

About Your Role

You will play a key role in shaping Swarm64's solution to secure our ongoing success. The Distinguished Database Software Developer will have the experience, expertise and confidence to become recognized for exceptional contributions in our team of outstanding software engineers. Further, you will interact with, learn from and educate our hardware development team. Depending on your experience and interests, you might take on immediately or develop over time into an advanced leadership role.

Responsibilities

- Software architecture design of Swarm64DB for advanced database features
- Deeper integration of Swarm64DB into PostgreSQL for performance and scalability
- Test and continuous integration strategies
- Take on increasing challenges over time and make use of opportunities to grow your skills and your personality

Requirements

- excellent C++ (14) skills
- several years of hands-on experience with writing database software
- the ability to communicate effectively, verbally and in writing
- proficient in software engineering processes

Personal Attributes

- We value people with the initiative and the can-do spirit to tackle and solve any problem hands-on and the character to stay the on course under pressure
- A team player with a “talk first” mentality and strong ability of working closely with other people, sharing responsibilities, work, success and failure inside the team
- Open, trustful communicator ready to share, help, praise, criticize, listen, advise
- Result orientation with a friendly, positive and confident style
