

# Chief Financial Officer at Keymetrics

## **Who are we?**

Keymetrics is a software start-up based in Paris and developing a Software-As-A-Service monitoring solution for web applications. Developers watch, optimize and debug their web applications thanks to our service.

Founded in 2014, the company is backed by Xavier Niel, New York Techstars accelerator, and since few months ago the VCs Alven Capital and Runa Capital. Keymetrics has been experiencing a rapid growth since its inception. We have more than 700 clients all over the world. Keymetrics is built on top of PM2, an open source project launched by the founder, that has been downloaded more than 25 millions times.

The team is composed of a dozen of resourceful people passionate about Open Source, new technologies, and technical challenges. We want to create an horizontal and collaborative work environment with a tons of good energy.

## **The job**

We are looking for our Chief Financial Officer to handle our high growth accounting and administrative workflow. The scope of the mission is likely to evolve and will include:

- Internationalization of our accounting process (decisional tools, invoices registering and reconciliation, VAT, URSSAF, relationships with our Certified Accountant, treasury management)
- Monthly financial reporting & business plan
- Administrative processes (State loans and subsidies, Insurance for both french and american entities)
- Legal work (Intellectual properties clauses, continual improvement of our contracts)
- Managing an intern

## **Profile**

*We are looking for a rare profile with a good experience in accounting, finance and corporate administration and a strong interest in science and/or programming.*

- Accounting & management studies
- Minimum 2 years experience in corporate administration and accounting (French rules and compliance is a must-have)
- Geek / scientific culture, knowledge of coding is a plus
- Resourceful
